

# TANVIR PATHAN

github.com/tanvirpathan — tanpat13@gmail.com — in/tanpat — tanvirpathan.github.io

## SUMMARY

---

- Industry experience with developing web/mobile applications, and scripting automated tests
- Comfortable with Java, Obj-C, Ruby on Rails, MySQL, Git and standard web technologies

## WORK EXPERIENCE

---

### Mitre Media

Toronto, ON

Full Stack Developer

May – Sept '17

- Designed and implemented various features across multiple Ruby on Rails sites
- Wrote workers to efficiently update 3000 objects on a daily basis
- Converted PHP pages to Rails sites to increase user interactivity by 22%
- Built a chrome extension to increase organization wide productivity as an intern project

### Bazaarvoice

Austin, TX

Software Developer

Sept – Dec '16

- Created Cordova based hybrid mobile application and SDK plugin for iOS and Android
- Wrote cross platform automated tests using Calabash for the mobile application which integrated with Travis-CI for continuous integration testing
- Open sourced the project ([git.io/vQYXA](https://github.com/tanvirpathan/vQYXA))
- Published a blog post on hybrid mobile development ([goo.gl/MwL2Z8](http://goo.gl/MwL2Z8))

### Connected Lab

Toronto, ON

Quality Assurance Engineer

Jan – Apr '16

- Developed test scripts using Calabash/Cucumber for mobile app testing
- Used the Swagger framework for API testing for web applications
- Tested software and hardware devices on platforms including iOS, tvOS, Android and Web

### Obero Solutions

Vaughan, ON

Quality Assurance Engineer

May – Sept '15

- Developed test scripts using Selenium WebDriver and wrote business requirement documentations

## PROJECTS

---

### Meme Stock Exchange (in beta)

[memesx.com](http://memesx.com)

- Rails based application for buying and selling memes with Reddit API integration
- Testing application with 200+ daily active beta users

### Bop-it!

[git.io/vQY15](https://github.com/tanvirpathan/vQY15)

- Used Obj-C to design and create a reaction based game involving UIGestureRecognizer, SpriteKit Particle Emitters and Facebook's POP Animation Engine for the iPad

## EDUCATION

---

### University of Waterloo

Sept '14 – Apr '19 (*expected*)

Honours Bachelor of Applied Science in Electrical Engineering

- Activities: Participated in the Google Games, various hackathons and inter-mural basketball
- Selected Coursework: Embedded Systems Design, Algorithms and Data Structures, Analog Control Systems
